

Transferring to a Four Year Institution

Ohio Transfer Module

In order to make it easier for students to move from one of the state's two-year colleges to a state four-year institution, the state of Ohio has developed a statewide transfer module. Each state institution has developed its own transfer module which complies with the established guidelines. The Rhodes State module consists of fifty four credits in specified English, mathematics, arts and humanities, social and behavioral sciences, and natural and physical sciences courses. When completed, the module will be accepted in its entirety at any one of the state's four-year universities and participating private colleges.

Although the Transfer Module was developed with students who are pursuing an Associate of Arts or an Associate of Science degree in mind, it is possible for students who complete one of the degrees offered by Rhodes State College to also fulfill the requirements of the Transfer Module by taking additional coursework. The following section describes the general guidelines of the Transfer Module.

Students who believe that they might be interested in completing the Transfer Module at Rhodes State College should consult with their advisor as soon as possible in order to plan an appropriate course of study.

Finally, state guidelines, as well as Rhodes State College's module, are subject to periodic change and revision. Students have the responsibility to work closely with their advisors to stay informed of those changes and revisions. Students interested in seeing the Rhodes State Transfer Module should contact the Dean of Arts and Sciences.

Articulation Agreements (Bachelor Completion)

Rhodes State College has entered into agreements with a number of four-year colleges and universities by which graduates can transfer to one of those institutions to complete a baccalaureate degree. These agreements often provide two-plus-two transfer opportunities in specific programs that is the receiving institution accepts the two-year program which the student has completed at Rhodes State College as the first two years of the baccalaureate degree. The student then can complete the baccalaureate degree at another college or university. Students can receive additional information on these agreements and the participating institutions from the Office of Admissions and Advising, Division Dean, Program Chair, or Director.

Course-By-Course Transfer and Evaluation

Students who do not take advantage of Ohio's Transfer Module or one of the Articulation Agreements can always apply for transfer to a four-year institution and have their coursework evaluated for transferability on a course-by-course basis by the receiving institution. Successful transfer of courses using this method requires careful planning on the part of the student. In particular, a student should consult early with the institution to which he/she wishes to transfer in order to determine the transferability of specific Rhodes State College courses. Although this option does not provide assurances of transferability as provided by the Ohio Transfer Module or the Articulation Agreements, it does allow flexibility for a student to select coursework which meet specific admission or program requirements of the receiving institution.
